

SWAG

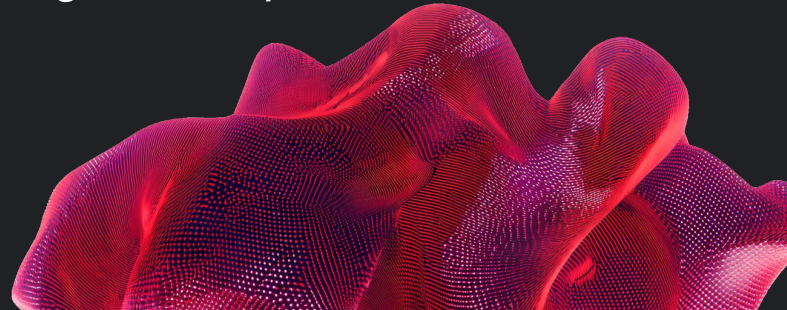

We have SWAG including socks, bottles, hats, Xmas jumpers, cups and credit coupons to give out on Sunday to **random** hackers pulled out of a hat who have built with and on Google tech, either through Gemini or Google Cloud.

Bonus points go to hackers who have mentioned using us on social (LinkedIn etc)

As this hackathon is SO big we don't have something for everyone :(

TELL US YOU ARE BUILDING WITH US:

<https://forms.gle/968bSFNUDvazhiwW6>

Main Prize - Legends Day

Top 5 teams who use Gemini or Google Cloud from Junction will be rewarded with the Legends Day cruise.

Joined together with representatives from Project Europe, experts from Google DeepMind and Google Cloud on a warship cruise along the coast of Helsinki.

Sauna on the deck. Cold plunge in the Baltic sea. Epic demos on Agents and Gemini.

And conversations that only happen when Europe's top hackers and founders are in the same place, disconnected from everything else.

A private gathering to celebrate the best of the best and build on the momentum that's carrying this new wave of European builders forward.
